

Environmental Concerns. Ideal Solutions.

Cimarron's environmental line of equipment illustrates how an out-of-the-box approach can yield high-performing, cost-effective solutions. Whether it's our high-functioning igniters, our emission-busting flares or our groundbreaking evaporator research, we've refined the combination of practical application with innovative engineering.

ENVIRONMENTAL PRODUCT DETAILS

ENVIRONMENTAL

EVAPORATORS

- Use Submerged Combustion Technology
- >98% Efficient
- Fully Automated
- Evaporates up to 120 bbls/day of production water and 1250 bbls/day of flowback water
- Low Maintenance

FLARES

- Certified to reduce emissions up to 99%, exceeding most state and regulatory standards
- Designed for low volume and high volume applications
- Flares are enclosed for maximum safety benefits
- Automation and data logging available

BURN MANAGEMENT SYSTEMS

- Custom designed to light and maintain flame
- Reduces fuel gas consumption
- Ensures continual unit operations for increased productivity and safety
- Environmentally-friendly by reducing fugitive emissions
- Options available including remote operations and data logging
- Designed for multiple burner applications
